

产品简介 OVERVIEW

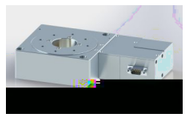

Feinixs推出的高精度真空

10^{-3} Pa

10^{-7} Pa

Feinixs high-precision vacuum stepper rotary stages are cutting-edge motion control solutions designed specifically for precise rotary positioning in high-vacuum environments.
Featuring special materials and vacuum-compatible design, standard models can operate stably for a long time under a vacuum of 10^{-3} Pa, and customized versions can achieve a vacuum level of 10^{-7} Pa.
